Application Download

Search and download for the "SIMI Smart" application from the Google Play store or Apple Store or scan the QR code below to download the App.

Registration

Once the SIMI Smart App has been downloaded and installed, click open.

If you are a new user you will need to register, using either your email or mobile number, and by clicking register.

You will be sent a verification code to your registered email address or mobile phone via SMS. Enter the verification code to proceed.

Enter a password of your choice and click 'Done'

You will then be directed to the SIMI Smart main page

Forgot Your Password?

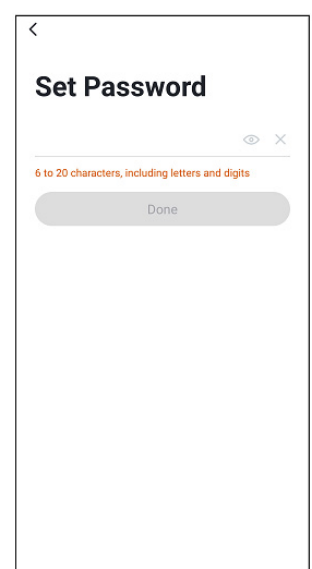

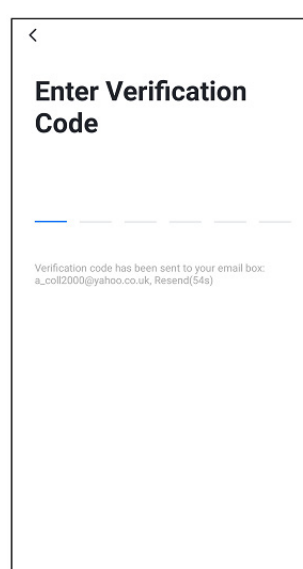

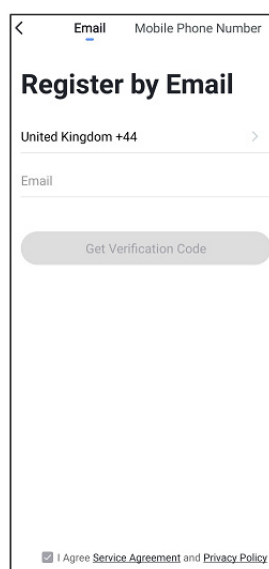

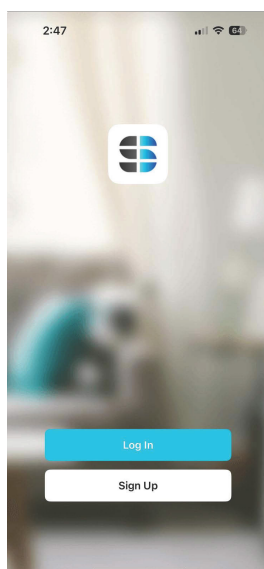

If you have forgotten your password, you can reset it by following the Password Retrieval procedure.

Click "Forgot password"

Enter the mobile phone number or email used to register the App and click " Obtain authentication code "

Enter the authentication code sent to your mobile phone number or email

Enter the new password and click "Completed" to log in

Home & Member Management

To Access Home Settings

Tap the “Me” icon at the bottom right. Then tap “Home Management” and select the home you want to manage (if you have more than one).

Home Settings Features

1. Home Name

Tap the name at the top to rename your home. (e.g., “Main House” or “Office”). The default name is "My Home"

2. Room Management

Tap on the name of each room to view and edit the devices assigned to each. You can also add new rooms (e.g., Living Room, Kitchen), rename, delete, or rearrange rooms. Once complete click 'Save' in the top right corner of your screen.

3. Location

Set the location of your home (used for weather, automations, etc.). Also useful for automations like “Turn on lights at sunset.”

4. Manage Permissions

View permissions for Admin & Common Members & add new roles

5. Home Member

View current members and their role. Tap “Add Member” to invite others to the home (family, roommates, staff). ***NOTE: Any member added to a home must also be registered on the SIMI Smart App.**

Select a role for the member: Administrator has full control & Common Member has limited control. Share an invite via the SIMI app, SMS or email or copy the invite link to share via another service. Once complete the member will be sent a request to join your home and you will see them under the Home Members section along with 'Waiting to join...' Once the member accepts the invitation they will be shown in the 'Home Members' section- Select the home you want to manage (if you have more than one).

To Create a New Home

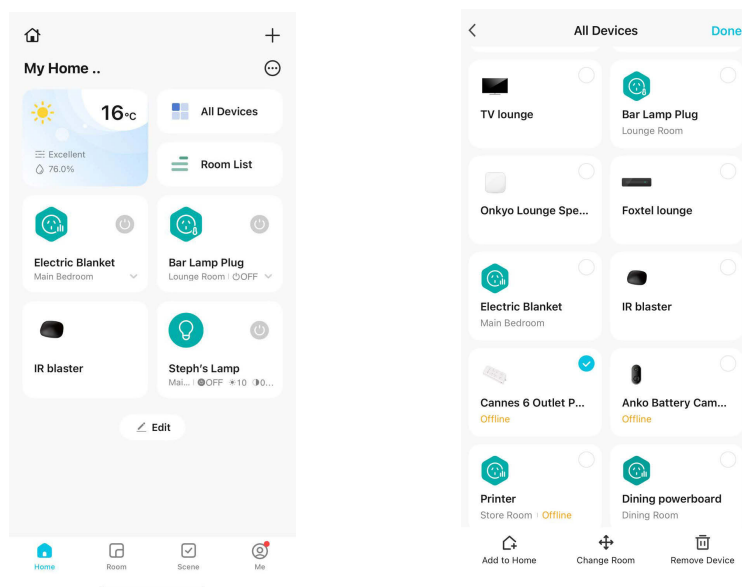

Tap the “Me” icon at the bottom right. Then tap “Home Management” and select "Create a Home." Enter a name for your new home and set a location. Select which rooms you would like to add to the home by ticking or unticking the rooms listed. Click on "Add Room" to create a custom label.

To Join a Home

Tap the “Me” icon at the bottom right. Then tap “Home Management” and select "Join a Home." Enter the invitation code that was sent to you by the administrator.

To Switch Between Homes

If you have created more than one home, you can switch between them by tapping on the image of the house on the top of your home screen. Select the name of the home you would like to view.

To Add Devices

To add your device select the + sign on your home screen. Follow the user manual supplied with your device. Once the device has been found, click on the pencil to edit the name of your device and add the device to a room.

Click "Yes" on the option to add the device to your home page, if you would like it to appear there. If you do not select this option at set up and wish to add the device to your home page at a later time, select "All Devices" from the top right hand corner and "Manage." Select the device & click on "Add to Home" on the bottom of the screen. You can also change the room the device is allocated to and remove the device from this screen.

To operate a device using the SIMI Smart app and a smart plug, make sure the smart plug and the device's own switch (like on a lamp) are both turned on. To turn the device on and off, always use the app.

Menus

Home

Shows all devices added and also rooms that can be controlled individually

Room

View devices in each room, add new devices to each room and create scenes in each room

Scene

Add automation for all devices such as 'All Off' or 'All On', time lapse, mode and child lock. You can create a scene that activates automatically when a condition is met, or a scene that you can manually trigger with a tap (Tap to Run).

Tap to Run

Tap to Run is a manual shortcut that lets you control one or more devices with a single tap inside the SIMI Smart app. It's perfect for when you want to instantly trigger actions yourself—like turning off all the lights when you go to bed, or setting the mood for a movie night. When you would like to trigger the action, you tap on "Scene" and click on the name of the action.

To add a new Tap to Run:

1. Go to "Scene" click on the + button & select "Tap to Run"
2. Choose what you want your devices to do (like turn on/off, change brightness, etc.)
3. Tap "Save" and give your Tap to Run a name (e.g., Good Morning, Movie Time)
4. When you want to use it, just tap the name of the scene in the Scene tab and your actions will happen instantly.

Set an Automated Scene

An automated scene runs based on a condition you set, like the time of day or when a motion sensor is triggered. It's perfect for automating your home, so things happen automatically without you having to tap a button. For example, you can set up a "Good Morning" scene to turn on the lights and coffee machine automatically every day at 7:00 AM. No need to manually trigger anything!

To add a new Automated Scene:

1. Go to "Scene" and click on the + button
2. Select which condition you would like to add (this is where you choose the trigger, like weather, schedule, or device status change)
3. Set up your condition (e.g., At 7:00 AM, or When temperature is more than 28 degrees)
4. Tap "Then" to choose what you want your devices to do (e.g., turn on lights, adjust the thermostat, etc.)
5. Tap "Save" and give your scene a name (e.g., Good Morning, Movie Mode)
6. Your scene will run automatically whenever the condition you set is met.
